EXPERIENCE & PROJECTS

CS100 - Software Construction | Flight Booking System **Jan 2023 - Feb 2023**

Developed a flight booking system as part of the final project for the Software Construction course. C++ | Git

- Collaborated with a team of 4 developers to design and develop the system, using Git for version control and project management. Held weekly meetings to discuss project progress and assigned tasks to team members based on their strengths and interests.
- Implemented a user-friendly command-line interface that allowed customers to search for flights, book tickets, and manage their bookings. Incorporated features such as seat selection, and filters to enhance the user experience.
- Conducted rigorous testing and debugging to ensure the system was bug-free and had a high level of accuracy in terms of pricing, availability, and booking confirmation.
